

Acquisition Brief — LunarSovereignty.com (EN)

Proposed Asset

- **Domain name:** LunarSovereignty.com (.com, exact-match)
- **Nature:** descriptive digital asset, designed as a **neutral banner** for the concept of “**lunar sovereignty**”: governance, safety zones, resources, infrastructure, international cooperation.

Not included:

- no engineering, mining, scientific, or regulatory services,
- no territorial claim, no titles, no rights,
- no datasets, tools, models, certifications, or labels,
- no affiliation with any space agency or government.

Contacts

- **Website:** <https://www.lunarsovereignty.com>
- **Email:** contact@lunarsovereignty.com
- **LinkedIn:** <https://www.linkedin.com/company/lunarsovereignty>

1. Purpose of this document

This brief enables an executive committee (Space Affairs, Diplomacy, Defense, Science, Energy, Legal, Think tanks, NGOs) to:

- understand the nature of **LunarSovereignty.com**,
- evaluate its potential as an **international governance banner**,
- identify potential uses (observatory, legal framework, coalition, index, academic hub),

- assess the strategic value of securing an **exact-match .com** on a sensitive 2025–2035 topic,
- use a **secure acquisition process** aligned with institutional standards.

This document is not a legal, scientific, technical, or diplomatic opinion.

2. What LunarSovereignty.com is / is not

2.1 Definition

LunarSovereignty.com is an exact-match .com domain describing the concept of:

Functional lunar sovereignty, meaning the coordination and governance of:

- **safety zones** around lunar sites,
- **responsible resource stewardship**,
- **power grids and communication infrastructure**,
- **cooperation protocols** between agencies,
- **rules of occupation, coexistence, and operations**.

It is a **neutral banner** for:

- observatories,
- multilateral initiatives,
- academic/legal platforms,
- coalitions,
- risk and governance frameworks.

2.2 What LunarSovereignty.com is *not*

It is **not**:

- a territorial claim,
- a land registry,
- a mining platform,
- a navigation or engineering service,
- a certification, standard, or authority,
- a technical, scientific, or regulatory service.

It is a **strategic semantic asset**, non-operational.

3. Context & global milestones (2025–2035)

Key trends include:

- rapid expansion of Artemis / Chang’e / ISRO missions,
- emergence of future **semi-permanent bases**,
- planned deployment of **reactors, energy grids, stations**,
- growing debate around **safety zones**,
- gaps between the **Outer Space Treaty (1967)** and modern activities,
- strategic importance of **critical resources** (ice, regolith, volatiles),
- potential for geopolitical tension around deployment and coexistence.

“**Lunar sovereignty**” (functional, not territorial) becomes a central governance theme.

4. Illustrative use cases

(Purely illustrative; non-binding.)

1. International “Lunar Sovereignty Observatory”

- monitoring governance practices and mission activities,
- mapping safety-zone risks and coexistence challenges,
- neutral publications and reference frameworks.

2. Academic / legal think tank

- a neutral space for jurists, diplomats, engineers, scientists,
- work on norms, safety, resource governance, and operational coordination.

3. Multilateral coalition

- shared rules and coordination mechanisms between nations,
- framework for peaceful coexistence and responsible operation.

4. International Index

- “**Lunar Sovereignty Index**”:

transparency on practices, compliance, mission coordination, and ethics.

5. Institutional communication hub

- public-facing entry point for lunar programs, alliances, research initiatives.
-

5. Why an exact-match .com?

As with ComputeSolvency.com or ClimateSolvency.com:

- **international neutrality**, free from national connotations,
 - clarity for space agencies, diplomats, boards,
 - durable anchor for reports, frameworks, and negotiations,
 - **semantic monopoly** on a rising governance concept,
 - credible and memorable at global scale.
-

6. Strategic advantage

- provides a **neutral frame** for a highly sensitive geopolitical domain,
 - unifies language across agencies, States, NGOs, and research institutions,
 - carries immediate recognition (“Lunar Sovereignty”),
 - adaptable as an initiative, observatory, coalition, index, or program.
-

7. Legal framework & responsibilities

- The seller transfers **LunarSovereignty.com** only.
- No territorial rights, scientific services, or regulatory functions are provided.
- No affiliation with space agencies or governments.
- No technical, scientific, or legal advice is included.

This document does **not** constitute:

- a territorial claim,
 - a scientific or legal guarantee,
 - a regulated service,
 - an official position from any public authority.
-

8. Standard acquisition process

1. Initial contact & NDA

via contact@lunarsovereignty.com.

2. Strategic discussions

observatory, think tank, coalition, governance hub, index.

3. Formal offer

valuation, optional limited bundle (≤ 2 compatible domains).

4. Legal & financial security

escrow service, digital-asset transfer agreement, EU invoicing.

5. Technical transfer

registrar transfer + DNS handover.

9. Specific safety notice

LunarSovereignty.com does not support or advertise any claim of ownership over the Moon or other celestial bodies.

The domain is intended for neutral, law-abiding discussion on governance, safety zones, resource stewardship, and shared responsibility.

Any future initiative must strictly comply with:

- **the Outer Space Treaty (1967),**
- **the Artemis Accords,**
- **existing and future multilateral frameworks,**
- **international safety and ethical standards.**
